

Calgary Scientific Product Team is always on the lookout for talented individuals. If you have an interest in creating cutting-edge products for the medical industry and feel you match the descriptions given below, send us your resume and a cover letter indicating why you would like to join us.

Please understand that due to the volume of submissions we receive it is not possible for us to respond to all those who contact us.

There are four broad disciplines within Product Team: product managers, software developers, quality assurance analysts and technical writers.

Product Manager

Product managers are responsible for establishing the vision for our products and ensuring that our products deliver powerful solutions to our end users. The product manager is the representative of the client in all internal meetings and the voice of the technical staff in discussions with clients. They are also responsible for product positioning, pricing, and marketing planning to ensure commercial success for our products.

Calgary Scientific uses modern software development techniques that give product managers enormous flexibility in their ability to respond to the needs of the market.

Key skills for product managers at Calgary Scientific include:

- Outstanding communicator and self starter
- Excellent multi-tasking and organizational skills
- Min 4 years successful PM role in a PACS or Advanced Visualization software company
- Must have Sales or Marketing background
- Expert knowledge in one or more of: PET/CT, Neuro imaging, Virtual Colonoscopy, CAD
- Sound knowledge of DICOM format
- Working knowledge of one or more of current AV software is an asset
- MBA or business background an asset
