

Calgary Scientific Product Team is always on the lookout for talented individuals. If you have an interest in creating cutting-edge products for the medical industry and feel you match the descriptions given below, send us your resume and a cover letter indicating why you would like to join us.

Please understand that due to the volume of submissions we receive it is not possible for us to respond to all those who contact us.

There are four broad disciplines within Product Team: product managers, software developers, quality assurance analysts and technical writers.

Quality Assurance Analyst

Ensuring that robust, high quality products ship from Calgary Scientific is the responsibility of the QA analyst. Development of our products present QA with considerable technical challenge that demands continual innovation in both processes and tools.

QA analysts at Calgary Scientific work on the forefront of industry innovation, continually exploring the latest thinking in techniques to rapidly release stable products in a constantly changing technical environment.

Key skills for QA analysts at Calgary Scientific include:

- Strong Analytical and Problem Solving skills
- Attention to detail
- Proactive and Self-Starter
- Exceptional Written and Verbal communication skills
- 4+ years of QA experience
- Experience with ISO 9001, ISO14385 or FDA submissions would be an asset.
- Knowledge of DICOM standard and exposure to the medical industry is highly desirable.
- Experience with Automated testing tools.
- Performance and Load testing skills would be an asset.
- Knowledge of Risk Analysis and Risk Mitigation strategies.
- Experience working on Windows, Mac and Linux platforms

We are looking for experienced product development and consulting services QA Analysts.
