

Calgary Scientific Product Team is always on the lookout for talented individuals. If you have an interest in creating cutting-edge products for the medical industry and feel you match the descriptions given below, send us your resume and a cover letter indicating why you would like to join us.

Please understand that due to the volume of submissions we receive it is not possible for us to respond to all those who contact us.

There are four broad disciplines within Product Team: product managers, software developers, quality assurance analysts and technical writers.

Technical Writer

No software product is complete without clear instructions for use, sample code and tips for achieving optimal productivity. It is in this area that the technical writing staff of CSI ensure that our products fulfill our vision for clients.

Technical writers work in a variety of mediums, making use of automated documentation tools, writing manuals and creating content for websites.

Key skills for technical writers at Calgary Scientific include:

- 3+ years of technical writing experience
- Exceptional written and verbal communication skills
- Ability to self-manage multiple projects
- Adaptability to changing and evolving projects
- Quick learner of new skills, concepts and technology
- Expert proficiency in documentation tools (e.g. Microsoft Office, Adobe Acrobat, Photoshop, InDesign, Illustrator, DreamWeaver)
- Proficiency with diagramming tools (e.g. Microsoft Visio, Omnigraffle, Adobe Illustrator)
- Experience developing end-user documentation
- Experience developing .NET and C++ API documentation
- Strong proficiency with working on Windows platforms
- Experience working on Mac platforms an asset
- Proficiency in HTML and CSS an asset
