Calgary Scientific Medical Group and ClearCanvas Announce Strategic Alliance

Seattle WA, May 16, 2008 - ClearCanvas, an innovative developer of open source healthcare applications, and Calgary Scientific Medical Group, a leading provider of user-friendly advanced visualization and analysis software, today announced a strategic alliance. The announcement was made at the annual meeting of the Society of Imaging Informatics (SIIM) in Seattle, Washington.

"Calgary Scientific has quickly embraced the potential of our highly extensible open source RIS/PACS platform by building a set of commercial advanced visualization tools that are easy to learn and use," said Norman Young, President of ClearCanvas, "Their powerful, intuitive tools are a welcome addition to what we hope will be a thriving ecosystem that includes both open source and commercial add-ins. We are pleased that their technology will be available to our community."

"We are pleased to announce this strategic agreement with ClearCanvas", said Dr. Byron Osing, CEO of Calgary Scientific. "ClearCanvas and their open source model represent a very innovative approach for expanding access to healthcare technology and improving its capabilities. Our goal from the beginning has been to improve the value of medical imaging by developing user-friendly advanced visualization tools and making them more accessible to radiologists, physicians and ultimately patients. We look forward to working with an innovator like ClearCanvas and providing cost-effective solutions to their growing community".

ClearCanvas will be showcasing their products at the Open Source Plug-Fest at SIIM on Friday, May 16, 2008.

About ClearCanvas

ClearCanvas is devoted to creating innovative open source healthcare IT applications that serve the common good. Our strong commitment to understanding the needs of users within radiology has led us to develop a RIS/PACS solution that is intuitive and easy to use. The solution is built on top of our highly extensible application platform, which empowers not only us, but also members of the ClearCanvas community to quickly add and customize functionality as they see fit.
