

Sentinelle Medical Enters Strategic Agreement with Calgary Scientific

Toronto and Calgary, Canada: June 4, 2009 – Sentinelle Medical Inc., a leading manufacturer of breast Magnetic Resonance Imaging (MRI) coils and software, and Calgary Scientific Inc., a provider of software enabling technologies, have entered a long-term strategic development agreement.

Sentinelle's products are built with dedication to advancing breast cancer detection, intervention and management through imaging. AEGIS with BRIGHT® and other AEGIS applications are core components of the overall imaging solution enabling greater confidence in diagnosis and accuracy in intervention. Sentinelle believes that in order to develop 'best-in-class' solutions, there is a need to leverage market-leading, enabling technologies with organizations such as Calgary Scientific.

"Sentinelle Medical is excited to be partnering with an innovative company such as Calgary Scientific to usher in the next generation of visualization technologies," said Cameron Piron, Sentinelle's President and CEO. "We believe this collaboration will provide significantly enhanced functionality, flexibility and experience to our customers through integration of a revolutionary technology platform."

Byron Osing, CEO and Chair of Calgary Scientific said, "We are very pleased to be strategically partnered with a sector leading, high-growth innovator like Sentinelle Medical. Sentinelle has broken through in the industry with leading edge technology in its domain of focus, and has signed high profile OEM and distribution agreements with multiple leading industry players as a result. This partnership pioneers a paradigm-shifting technology that answers the industry's current and future customer demand for the fully web-enabled access to and use of medical information technology. We look forward to a long and mutually fruitful partnership."

About Sentinelle Medical Inc.

Sentinelle Medical is dedicated to improving patient care with early detection and accurate intervention. The company researches, develops, manufactures, sells and supports leading edge Magnetic Resonance Imaging (MRI) technologies. The ground breaking Sentinelle Vanguard® breast coils provide excellent quality MR images, complete and open access for intervention and award winning design that optimizes patient comfort and workflow. Sentinelle products are used in leading breast cancer and imaging sites throughout North America including Dartmouth-Hitchcock Medical Centre, H. Lee Moffitt Cancer Center and Research Institute, Mountain Medical Physician Specialists, Radiology Ltd., Scripps Memorial Hospital, Sunnybrook Health Sciences Centre, University Health Network and Windsong Radiology Group. Sentinelle Medical is a privately owned Canadian company.
